

PRO-USE 241

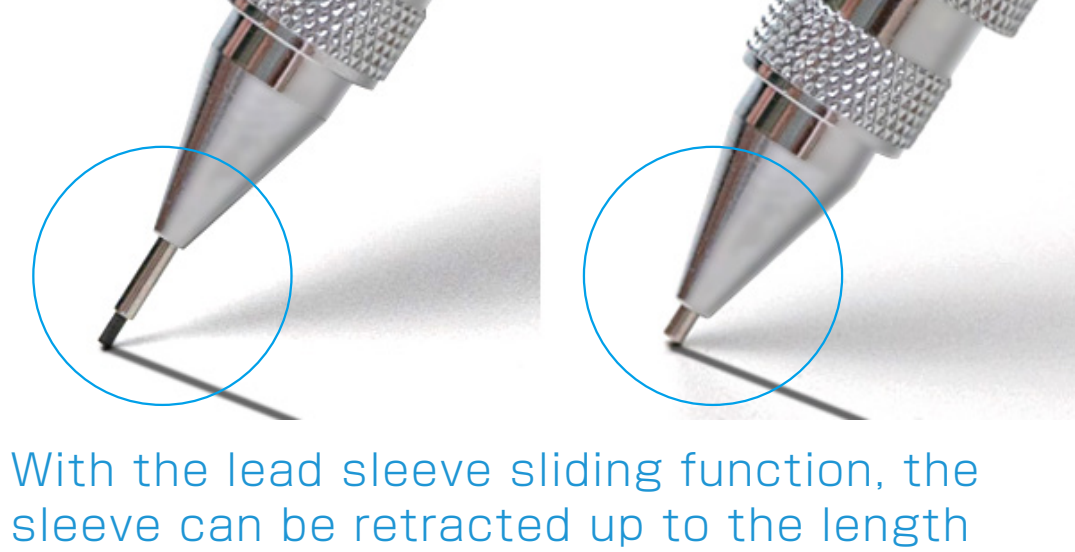

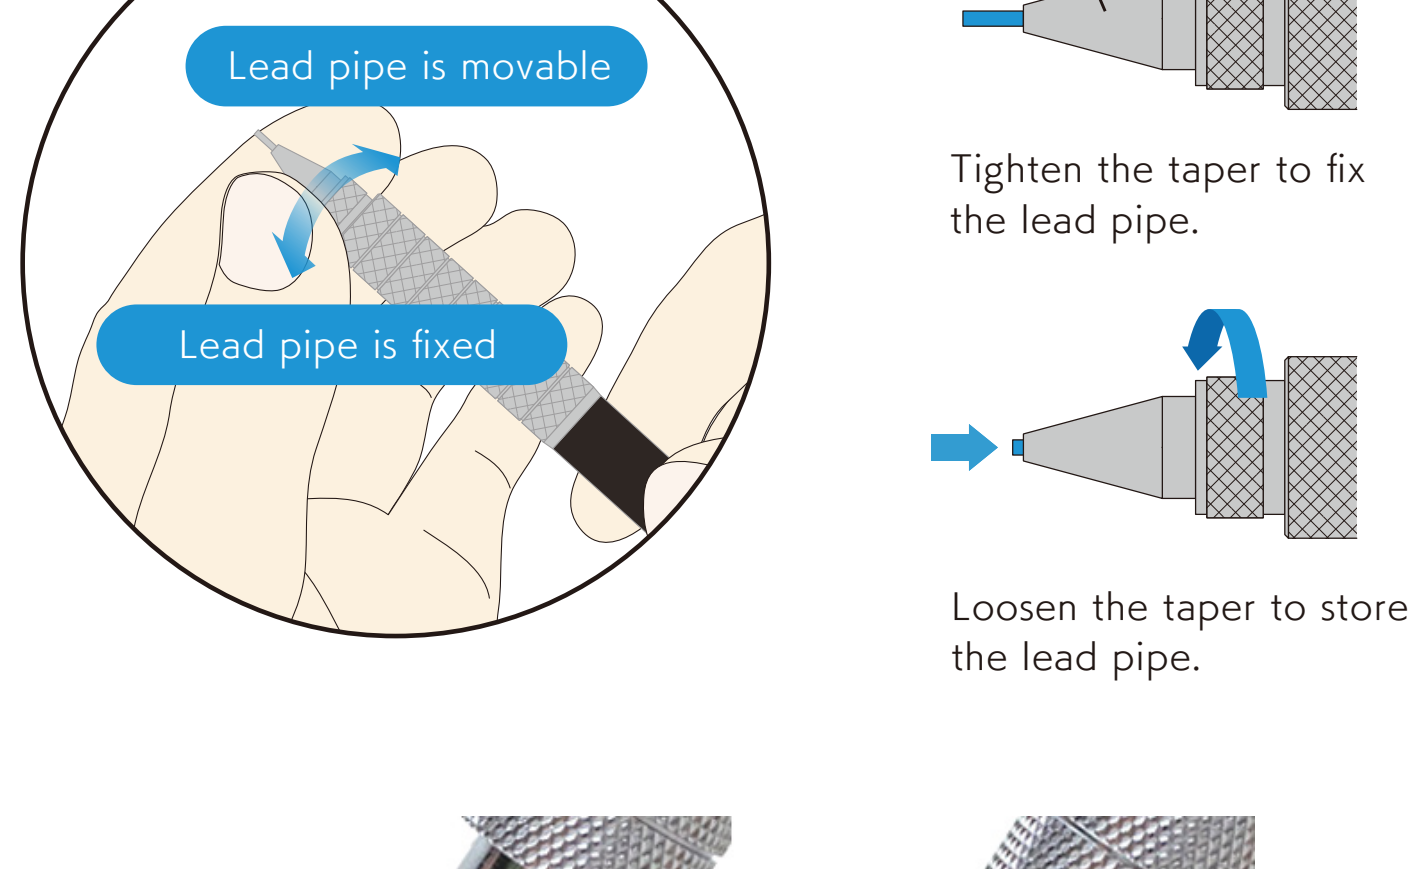

A New Model Equipped with On/Off Function for “Hayaai Mechanism” Launched from PRO-USE Series

Four selectable mechanical pencil functions in one Mechanism	Hayaai Mechanism	Lead Switch Mechanism
For heavy users who write a lot continuously	ON	ON
For stenographers, reporters and hardy note takers who want to write fast	ON	OFF
For creators (equivalent to PRESS MAN)	OFF	ON
For industrial designers	OFF	OFF

On/off function for “Hayaai Mechanism”

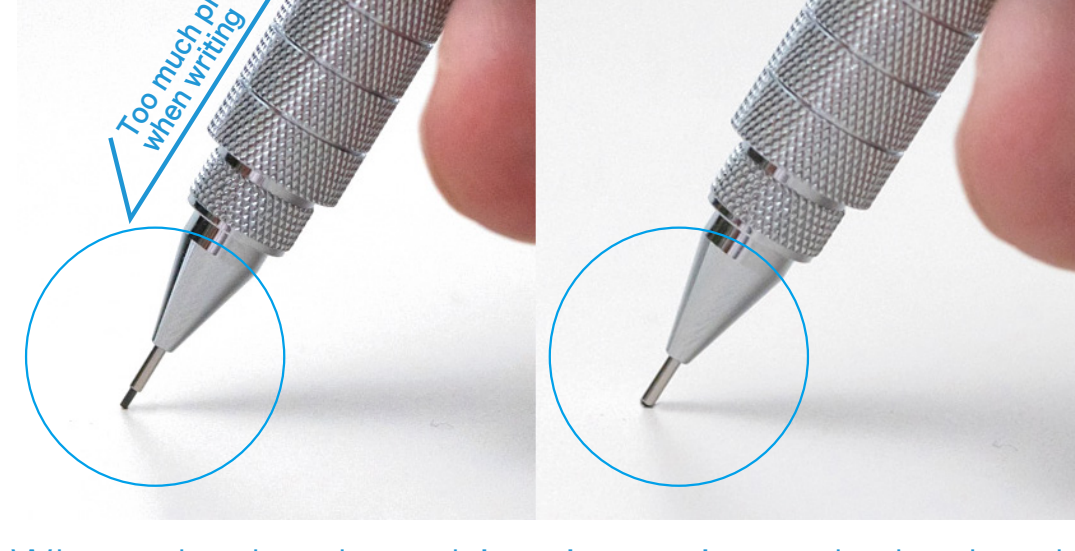

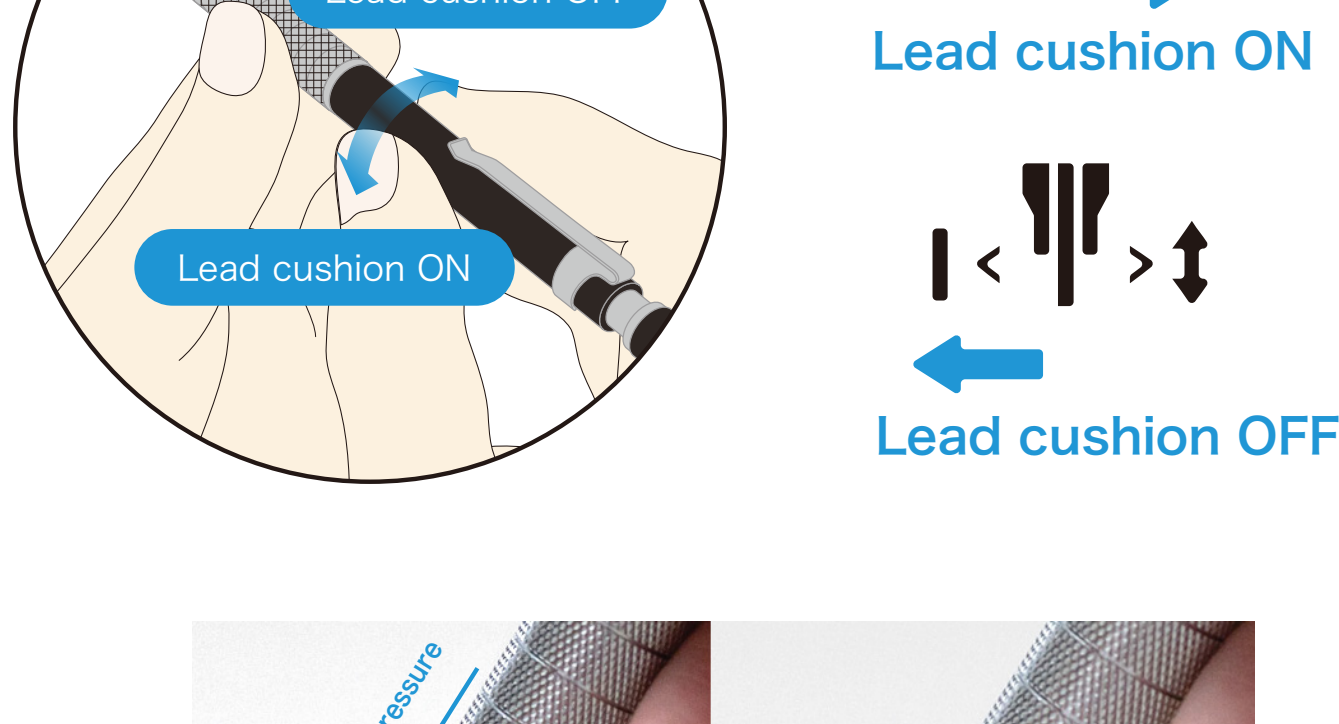

Tighten the taper to fix the lead pipe. Allow the lead pipe to move by loosening the taper.

With the lead sleeve sliding function, the sleeve can be retracted up to the length shown in the photo on the right to allow writing even when the extended lead gets used up.

On/off function for “Lead Switch Mechanism”

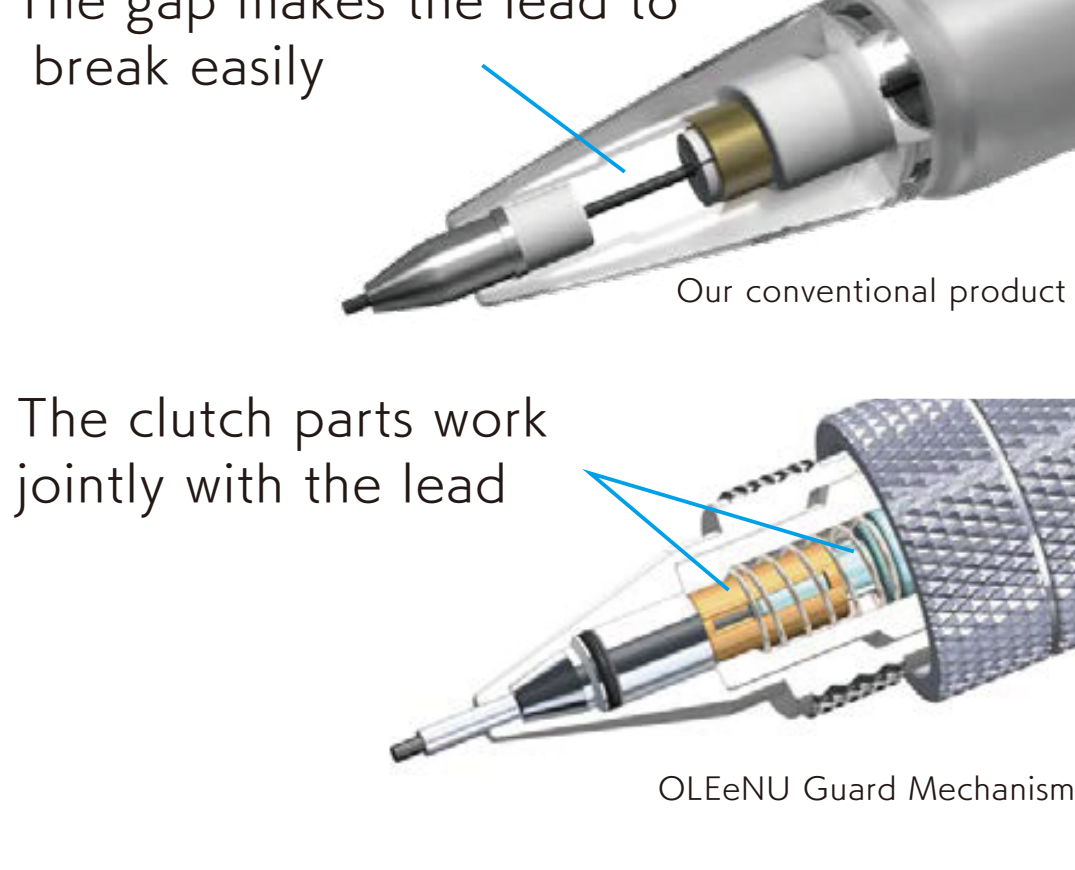

By twisting the body while holding the gripper, the Lead Switch Mechanism can be switched on or off. When ON, the cushion holds the lead and absorbs shocks during writing. When OFF, the lead is fixed, providing a firm writing experience ideal for drawing lines with a ruler. Lead pipe is movable

When the lead cushion is activated, the lead is retracted inside the lead sleeve (pipe) when too much pressure is applied.

Equipped with the “OLEeNU Guard Mechanism” that protects the lead from external shock. Newly designed grip with knurling.

The two clutch parts built into the taper fully protect the lead from shock. When pushed, the two parts work jointly to minimize the gap between the mechanism that grasps the lead and the tip, which causes the lead easily broken, protecting the lead inside the pencil from external shock when dropped or on the move. Users can write smoothly at any time with less stress.

Product number	MSDD-2500B	
Barrel color	#1 Black	#56 Blue
Lead	0.5mm	
Product code	2477019	2477569
JAN code	4977114924675	4977114924682
Specifications		
Size	143.5mm(141mm When the pipe is stored) 10mm(max diameter), average weight 25.7g	
Material	Barrel : PC resin, Indicator : ABS resin	
	Clip : Chrome coating in iron	
	Taper : Chrome coating on brass	
	Grip : Chrome coating on brass	

Package

Body : Paper, PET
Size : W60.5 x D19 x H182mm
Weight : 46g(with a pen)
Hanging type : Butterfly
