## The New #3776 CENTURY Fuji Series *Fuji Unkei “Kinu-Gumo”*

To celebrate the release of Platinum Pen's model, the #3776 CENTURY, a series of fountain pens called “Fuji Five Lakes” was created from 2011 to 2016, followed by the “Fuji Shunkei” series from 2017 to 2021, which showcased the beautiful seasonal scenes of Mt. Fuji on the body of the pens using an advanced cutting technique. In 2023, the “Fuji Unkei” series was born with the concept of expressing that image using various decorative methods, inspired by the beautiful scenery created by the collaboration of Mt. Fuji and the surrounding clouds. As the third product in the series, we will be releasing “Kinu-Gumo,” which takes on the challenge of new decoration.

## Expressed using two types engraving.

Kinu-Gumo generally refer to cirrus clouds. “Kinu” in Japanese means silk, and cirrus clouds are characterized by their thin, delicate, fibrous, or feathery appearance, resembling silk. Fuji Unkei Kinu-Gumo expresses these characteristics delicately and dynamically with two techniques used for metal decoration: “guilloché engraving” and “V-blade engraving.” By daring to create unengraved areas, the presence of clouds in the sky can be felt even more, and this is truly a cloudscape.

### Dome

The nut inside the dome honors Mt. Fuji and is the signature of the Fuji series. The serial number is engraved on the dome

### Engraving

Two types of engravings on the transparent body create expressive cirrus clouds.

### Nib and the grip section

The 14K gold nib, plated with rhodium, radiates subtle brilliance. Available in Extra Fine, Fine and Medium Broad sizes. A new color scheme is used for the grip section colored in a translucent Blue green that matches the color of the cap.
